MULTISENSORIAL

eine Konzertperformance für die Sinne

2016

Duration: variable (normally, 61 minutes)

MULTISENSORIAL (*eine Konzertperformance für die Sinne*) is a performance by Garavaglia, Gerwin und Robles Angel which was premiered as the opening of the Exhibition *Windrosen - Kunst über Sinne* at the Künstlerforum Bonn, in the city of Bonn, Germany on November 6th, 2016.

Apart from a live viola and live percussion, the piece combines not only multiple multimedia elements, such as electronic sounds, live-electronics and live-video (listening to and watching), but it also challenges the perception of the audience through the insertion of other elements during the performance, which are directed to the other senses, for example the *smelling* of exotic fragrances, the *savouring* of small delicacies, etc. Hence, the composition uses most of the human senses as a creative material not only as an innovative artistic expression, but also for a multisensorial and comprehensive (with all the body) perception by the audience.
